

Schülerinnen und Schüler der 8. und 9. Klasse der Schule in Hora Sv. Kateřiny besuchten das Werk von SIMONA Plast Technik.

## Die nächste Generation ist unsere Zukunft The next generation is our future

» von **Jitka Vokáčová** Schülerinnen und Schüler schnupperten „SIMONA Luft“ beim Werksbesuch in Litvínov. Die junge Generation interessierte sich besonders für das Thema **Nachhaltigkeit**.

» by **Jitka Vokáčová** Youngsters got their first taste of SIMONA on a visit to the Litvínov plant. The young generation showed a particular interest in sustainability.

Es geht wieder los! Im Mai waren Schülerinnen und Schüler der 8. und 9. Klasse der Schule in Hora Sv. Kateřiny bei SIMONA Plast Technik zu Gast. Dies ist ein weiterer Schritt zurück zu einem normalen Alltag. Uns macht es großen Spaß,

Auf ausdrücklichen Wunsch der Jugendlichen stand in diesem Jahr das Thema Nachhaltigkeit im Vordergrund. Insgesamt waren 19 Schülerinnen und Schüler mit ihren Lehrkräften Staňa Borejová und David Franc bei uns im Werk.

Als kleines Dankeschön haben unsere Gäste einen SIMONA Stern gebastelt, indem sie ihre Erinnerungen an den Tag festgehalten haben.

Finally, it was that time again! In May, SIMONA Plast Technik welcomed some class 8 and 9 pupils from the school in Hora Sv. Kateřiny, marking a further step on the path back to a normal daily routine. For us, it's really exciting not only to show off our plant but also to share our passion for our work with young people. And who knows? Maybe one or two of them will be employed here in the future or relying on our products as one of our customers?

Hora Sv. Kateřiny is a village in the Ore Mountains, not far from Litvínov and a stone's throw from the German border. These kinds of plant

visit normally happen on a regular basis, and our Head of HR in Litvínov, Jitka Vokáčová, is always organising initiatives involving local schools.

Unfortunately, these activities had to be put on hold for two years because of the pandemic. We were therefore all the more delighted to finally be able to welcome our first guests once again. The visits, which last several hours, usually consist of a short presentation and plant tour, finishing up with a discussion on all manner of different topics.

At the young people's express request, the main topic this year was sustainability. A total of 19 youngsters came to visit our plant, accompanied by their teachers Staňa Borejová and David Franc.

As a small token of their appreciation, our guests hand-crafted a SIMONA star in which they wrote down their memories of the day.
