

# Flying Cyprian

Cyprian was the most famous monk in Red Monastery

The legend began like this .....

One day the monks found a wounded man in front of the gate. They healed him and accepted him among themselves. He slowly began to get used to life in the Monastery. He learned medical medicine. He was followed by a demon from the past, so he took an oath of secrecy and named himself Cyprian.

← Cyprian

Cyprian later found a signed book by Leonardo da Vinci. Cyprian then built magic wings by this book. When he built the wings he climbed on a rock called 3 Crowns and flew on the magic wings.

← 3 Crowns

← Red Monastery

He flew so high that angel struck him with lightning. Cyprian fell down. At the place where the Cyprian fell grew a rock which to this day is called the Monk. It is said that the Cyprian was intended to fly to God.

## Interestingness

Cyprian knew how to heal well. He also had his own pharmacy. His greatest work is called Herbar from 1766 which contains almost 300 plants.

← This is Herbar

we were there
